DETAILED ACTION

Allowable Subject Matter

1. Claims 1-9 are allowed.

2. The following is an examiner's statement of reasons for allowance: The instant invention is a garment hanger with a neck portion, opposing shoulder portions extending therefrom, a hook portion for suspending the hanger, a first bar member horizontally disposed between the shoulder portions, and a second bar is coupled to the first bar and rotatable outwardly therefrom. The patentably distinct feature of the instant invention is the specific requirement that the second bar engage with multiple fixed angular stops for supporting a second garment on the second bar in a certain orientation with the first bar. The multiple fixed stops allow the second bar to be oriented above, below, or in the same plane as the first bar. The prior art cited in the attached PTO 892 provides a good representation of the most pertinent prior art to the instant invention. The common feature lacking in each of the prior art references is the ability to selectively orient the second bar.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
